

**Egnater Rocktron TOL 50
Footswitch Schematic
Model BG2**

1. LED = Radio Shack 276-0330. 5mm Red LED 1.8V 20mA 120mcd
2. LED Holder = Radio Shack 276-0060 Accepts Chrome T-1 3/4 (5mm), 1/4" Mounting Hole
3. Viewed here from under side.
4. Original footswitch did not have R100 on channel select, I added it for current limiting to prolong life of LED.
5. I am not sure what original resistor was on Boost side, but 1K does work.
6. Yes, this is correct that the Boost LED is in parallel with switch and the channel select LED is in series.
